My dear General:

This will acknowledge your letters of 25 and 26 May and the copies of Volume I, II, and III of ATIS Publications. I note that additional volumes will be distributed as completed.

I should like to take this opportunity to state that the ATIS reports are of great value to the national intelligence picture, and that extensive use is being made of them within this Agency. Not only are they examined immediately upon receipt by Analysts concerned with their individual subject matter, but their contents are kept continually available for researchers by means of a unique machine card indexing and filing system.

It will interest you, I know, to learn that the subject matter in these interrogations frequently coincides with or is verified by similar reports coming to us from points far distant from your Headquarters. In many cases, however, the ATIS reports are the only source available, and their accuracy is therefore of great import to a well rounded intelligence picture.

It is most certainly to be hoped that the important work being done by the Translator and Interpreter Section will not be further jeopardized by personnel deductions.

Many thanks for sending us the ATIS publications and for calling them to my attention. With kindest personal regards, please believe me,

Sincerely,

DSO
